

PHILOSOPHY

Outer beauty and inner health, to Kerstin, these two pursuits go hand in hand. Kerstin feels the key to her success is using pure natural resources of the highest quality, innovative technologies and research, and a philosophy from both East and West. Kerstin's philosophy and product line emerged from firsthand knowledge of the most renowned spas in Europe and years of research, travel, and work finding ingredients that contain the world's great natural healing powers. Throughout history, the people of Europe and beyond have recognized the health benefits of ancient spa traditions and natural resources, Kerstin Florian products and treatments combine these traditions and benefits to provide a modern approach to healthy skin.

PRODUCTS

Kerstin Florian products are a sophisticated blend of Swedish simplicity, historical European Spa Tradition and age-old Oriental philosophy. This blending has resulted in an ideal regimen for today's active women and men looking for a natural, simplistic and yet, extremely effective approach to skin care and health. The results are undeniable: healthier looking skin, more energy, reduction of stress and an increased sense of well-being.

"Caring for the skin is part of good health and preventive health measures. None of us can maintain the look of a twenty-year-old forever, following the traditional European spa concept that stresses healthy nutrition, a good fitness program, psychological well-being, and proper care of the face and body, we can grow older being in balance and reflecting a true beauty that comes from within." —Kerstin
